

Microsectional Analysis & Training

Comprehensive Quality Training Course

Microsectional Preparation Analysis And Training:

Refine your PWB Microsectional preparation and analysis techniques. Microtek Laboratories invites you to attend the only training program for Printed Wiring Board Microsectional Preparation and Evaluation. Technicians and Inspectors will benefit from a dynamic combination of classroom lecture, slide and video presentation and hands-on laboratory training.

Primary Course Focus and Key Areas of Development

- Microsectional Preparation Analysis Training
- Improve your Microsectional techniques
- Achieve highest quality
- Enhance measurement accuracy
- Increase your evaluation skills

Course Price: \$495

Course Length: 1 day

Location: Anaheim, CA Facility

The 1-Day Course Description

The first half of this 1-day course covers both manual and semi-automatic Microsectional preparation techniques and will provide the technician with the base knowledge needed to prepare accurate, scratch-free Microsectional mounts. The second half covers much of the evaluation criteria required by today's demanding military and commercial standards.
